Bangka Belitung

Information Technology graduate from Atma Jaya University Yogyakarta with hands-on experience as a Full Stack Developer and IT Developer specializing in .NET Core. Skilled in designing, developing, and enhancing web-based applications while ensuring system reliability and performance. Demonstrates strong analytical thinking, troubleshooting expertise, and a proactive approach to learning new technologies, enabling effective adaptation to evolving business and technical environments

Work Experiences

Integrasi Logistic Cipta Solusi - Surabaya & Jakarta

Nov 2024 - Nov 2026

IT Developer

PT Integrasi Logistik Cipta Solusi (ILCS) is the Information Technology subsidiary of Pelindo, responsible for planning, developing, and managing IT services across the Pelindo Group. The company supports the digitalization of port operations and logistics services to improve efficiency in national and international trade and transportation.

- Supported the successful implementation and migration of data from Gen-C to PTOS-M at the Tanjung Tembaga branch, ensuring system stability and minimal downtime.
- Resolved 20+ system incidents weekly with an average turnaround time of under 8 hours, maintaining high service availability.
- Created and maintained 10+ knowledge base and troubleshooting documents, reducing issue resolution time by up to 40%.
- Performed root cause analysis (RCA) to identify recurring issues and implement long-term solutions that improved system reliability.
- Collaborated with cross-functional teams, including support engineers, developers, and external vendors (PLY), to troubleshoot, analyze, and resolve complex system issues.
- Participated in weekly operational review meetings to track incidents, evaluate system performance, and document action plans.
- Monitored and coordinated PTOS-M enhancement activities, ensuring timely communication and progress tracking with external stakeholders.

Kantor Sistem Informasi - Universitas Atma Jaya Yogyakarta

Aug 2023 - Feb 2024

Pengembangan Sistem Intern

To become a service provider in the field of information and communication technology and infrastructure to support improving the quality of teaching and learning processes and research.

- Developed and enhanced a web-based university portal using ASP.NET Core to streamline academic information management and communication.
- Utilized Entity Framework for database management, ensuring efficient data access, integrity, and maintainability.
- Designed and implemented responsive user interfaces, improving usability across desktop and mobile devices.
- Implemented a multi-role access system, extending functionality from lecturer-only access to support both lecturers and students.
- Performed unit testing, debugging, and application optimization to maintain system performance and reliability.
- Collaborated with stakeholders to gather requirements and deliver solutions aligned with institutional needs.
- Increased the efficiency of academic information access through the development of an integrated and centralized portal platform.
